

*Creating a legacy for future generations*

*2013-2014 Report to the Community*

# Woodlands Conservancy's

mission is to preserve and develop an ecosystem dedicated to creating daily public opportunities for recreation, ecotourism and education in a natural and historic setting.

## In Memory of Andrew T. Whitley

On February 10, 2014, Woodlands Conservancy lost one of its first true Ambassadors, Andrew Thomas Whitley. Andrew first heard about Woodlands Conservancy during a casual conversation at a luncheon and from that point forward was a vocal Ambassador for the effort. He soon became chairman of the Development Committee and proudly wore Woodlands Conservancy's signature jewelry, the Mignon Faget Palmetto Lapel Pin, utilizing it as a conversation piece to share his passion for Woodlands Conservancy with others. He literally sailed his boat to a Legacy Party at the Freeport McMoRan Boathouse in order to not miss the opportunity to help cultivate donors to become engaged with Woodlands Conservancy. He shared stories of his love for hiking on Woodlands Trail with others to encourage donations to the organization and the Woodlands Conservancy Endowment Fund at the Greater New Orleans Foundation.

## Board of Directors 2014

# Donor Spotlight

## Ambassadors Borden & Sara Wallace

Borden and Sara Wallace became members of Woodlands Conservancy in 2009 and have been increasingly more involved ever since. Borden's and Sara's close connection with nature put them in a position to eloquently share their view of the value of Woodlands Conservancy's efforts to preserve the bottomland hardwood forested acreage for wildlife and recreation.

Borden sought the support of Daybrook Fisheries to fund the Daybrook Pavilion at Woodlands Trail to expand the use of the site as an outdoor classroom to encourage environmental stewardship in current and future generations. The Wallaces opened their home to Woodlands Conservancy to host the first Legacy Party that was organized to invite their friends to contribute to the Woodlands Conservancy Endowment Fund at the Greater New Orleans Foundation to ensure the maintenance and growth of Woodlands Conservancy's conservation and education efforts.

## Shell Funds Restoration & Volunteer Efforts

During a press conference and celebration of the acquisition of Delacroix Preserve, Ed Landgraf and Josh Eskind of Shell graciously presented Woodlands Conservancy with a check for \$35,000. The grant funded Ecosystem Restoration Work to remove non-native, invasive vegetation from Woodlands Trail and volunteer efforts to engage community members and interest groups in caring for the properties managed by Woodlands Conservancy.

## Entergy Funds Site Improvements

A \$33,000 grant from the Entergy Foundation was received to fund site improvements at Delacroix Preserve and community outreach efforts. The funds allowed the installation of a culvert, creation of a parking area and improvements to the trail leading to the bird research station. The community outreach efforts funded marketing throughout the Greater New Orleans area that served to raise the visibility of Woodlands' efforts and engage more community visitors and volunteers.

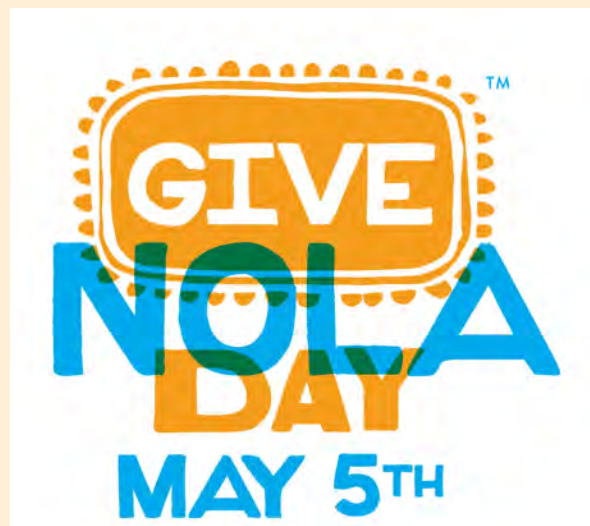

# 24 hour event raises friends and funds

GiveNOLA Day is an annual fundraising effort initiated and hosted by the Greater New Orleans Foundation in 2014. The inaugural event was held on May 6, 2014. The 24-hour fundraising effort is an online giving event to inspire people to give generously to the nonprofit organizations that make the Greater New Orleans region a stronger and thriving community for all.

Every dollar donated online to Woodlands Conservancy at [www.GiveNOLA.org](http://www.GiveNOLA.org) from midnight to midnight on May 6th was increased with additional "lagniappe" dollars provided by the Greater New Orleans Foundation and generous GiveNOLA Day sponsors.

During the 2014 GiveNOLA Day event, 69 donors made online contributions to Woodlands Conservancy totalling **\$16,788**.

**SAVE THE DATE: GiveNOLA Day for 2015 will be held on Tuesday, May 5.**

## Thank you to our generous 2014 GiveNOLA Day Donors

# Achieving conservation and education goals

## Delacroix Preserve Placed on Natural Areas Registry

Sairah Javed, a Biologist with Louisiana Department of Wildlife and Fisheries Natural Heritage Program, came to Woodlands Conservancy's Delacroix Preserve to present the organization with a plaque recognizing the dedication of the "Delacroix Preserve Natural Area." Dan Dreiling, Board President of Woodlands Conservancy, welcomed visitors to the special occasion at Delacroix Preserve to "formally recognize Woodlands Conservancy's efforts to care for and enhance this unique forest that provides a rich habitat for wildlife and migratory birds and protects the community by serving as a natural sponge and wind buffer during storms."

To qualify for the Registry a property must contain at least one of the following natural values: habitat for native plants or animals with rare or declining populations in Louisiana; plant communities characteristic of the native vegetation of Louisiana; or outstanding natural features such as old growth forests or wetlands. Javed noted that "Delacroix Preserve is being recognized on the Natural Areas Registry as it includes all three of these special characteristics."

## Cummins Mid-South Volunteer Event

Employees of Cummins Mid-South selected Woodlands Conservancy's Delacroix Preserve as the site for their 2014 employee community volunteer effort. Thanks to the coordination of Calvin Klotz, Mike Aufdermauer, and Dana Morvant of Cummins Mid-South and Lee Dupont of Woodlands Conservancy and the efforts of Cummins Mid-South employees, Delacroix Preserve has a pavilion for use during research and education events.

## Kiosk Built by Eagle Scout

Jared Neeb selected the construction of a kiosk along the Bottomland Trail as his Eagle Scout Project to be completed prior to his 18th birthday. The kiosk was built near the grouping of ten World War II Ammunition Magazines at Woodlands Trail and contains information about the history of the use of the property dating back to the early settlers of Louisiana. Stop by and see the excellent craftsmanship on your next visit.

# *Raising friends and funds*

## **Wild Wine Dinner – an evening of great food, great wine and great friends**

The Woodlands Wild Wine Patron Party and Dinner was held at English Turn Golf and Country Club on Saturday, November 15, 2014. The Patron Party was sponsored by Dakota Shy Wine and its proprietor, Todd Newman. Todd's business partner, Tanner Sneed, traveled from this boutique wine vineyard in Napa Valley to share Dakota's Shy's story as well as its fine wines.

The cocktail party was held in the Garden Room where guests could taste wines and champagne donated by Republic National Distributing Company and mingle among tables of silent auction items including art, jewelry, decorator items, services and fine wines. An elegant seated dinner was prepared by Chef Stewart Redhead with wines provided by a generous anonymous donor.

The guests of honor were Lee and Nancy Dupont who were toasted to express gratitude to them for sharing the vision of Woodlands Conservancy to create a legacy for future generations and their major contribution that allowed the acquisition of the properties that created the Delacroix Preserve.

The elegant event was sponsored by Chevron Oronite, Power System Specialists and the Louise H. Moffett Family Foundation. The event raised over \$25,000 thanks to the hard work and dedication of Katie and Carl Rosenblum, Katie Brasted and a team of volunteers from the board and the community..

# Planning for the future and sustainability

## Wetlands Research & Education Center Strategic Master Plan

During a twelve month period spanning the latter part of 2013 and the first half of 2014, the Woodlands Conservancy Planning Committee worked with Mossop & Michaels Architecture Firm. The Delacroix Preserve Strategic Master Plan for the Wetlands Education & Research Center was completed in October 2014 and details the elements and phased costs of construction. The Delacroix site is currently the focus of ongoing resident and migratory bird research and ongoing systematic, data-based ecosystem restoration activities to enhance this dwindling habitat for wildlife and migratory birds.

## Freeport Boathouse site of Legacy Party

Completely surrounded by nature, the Lakefront was the perfect setting for a Legacy Party to friend and fund raise for the long term sustainability of Woodlands Conservancy. The event, was organized by then President of the Board of Directors, Dan Dreiling, pictured at near left. Thanks to the generosity of Freeport McMoRan's Dean Falgoust, the event was held at the Freeport McMoRan Boathouse. Dennis Baggot and Jimmy Moran volunteered their time and talents to serve guests cocktails and appetizers throughout the sunny afternoon.

Legacy Parties were initiated in 2013 to spread the word of the efforts of Woodlands Conservancy and to garner support to build the Woodlands Conservancy Endowment Fund that is held at the Greater New Orleans Foundation. Greg Holt, pictured at right, spoke of the value of the efforts of Woodlands Conservancy and why Daybrook Fisheries is committed to helping the organization with its current and future plans.

# Bird Observatory takes flight

## BTNEP Provides Start-up Funds for Bird Observatory

Barataria-Terrebonne National Estuary Program (BTNEP) provided funds for Woodlands Conservancy to conduct important research on resident and migratory birds beginning in 2014. Working in collaboration with Baton Rouge Audubon Society, Woodlands Conservancy joined the effort of the Louisiana Bird Observatory to better the understanding of birds and their populations. In addition to contributing to state-wide analysis of bird behavior in Louisiana, data collected during monthly banding sessions at both Woodlands Trail and Delacroix Preserve will help evaluate differences in bird behavior in healthy forested wetlands compared to those in restored areas and those in unrestored areas.

Federally permitted, trained Banders utilize mist nets to capture resident and migratory birds at both Woodlands Trail and Delacroix Preserve on a monthly basis. The bird is outfitted with a numbered leg band and a variety of measurements are taken before the bird is released. The data is uploaded to a regional and national data base and provides valuable information including:

- migratory routes and behavior
- wintering and breeding areas
- physical health of populations
- causes of mortality

The Woodlands Conservancy Bird Observatory is obtaining data to assess bird characteristics and use of healthy forested areas, restored forested areas and areas containing non-native vegetation in order to guide management decisions in this vital dwindling habitat.

In the first 12 months of operation, Woodlands Conservancy has banded 438 birds representing 37 species including: Acadian Flycatcher, American Robin, Black-and-White Warbler, Blue-Gray Gnatcatcher, Blue-Headed Vireo, Carolina Chickadee, Carolina Wren, Common Grackle, Common Yellowthroat, Downy Woodpecker, Eastern Phoebe, Gray Catbird, Hermit Thrush, Hooded Warbler, House Wren, Indigo Bunting, Kentucky Warbler, Myrtle Warbler, Northern Cardinal, Northern Waterthrush, Orange-crowned Warbler, Oven Bird, Painted Bunting, Pine Warbler, Prothonotary Warbler, Red-Eyed Vireo, Ruby-crowned Kinglet, Swainson's Thrush, Swamp Sparrow, Tennessee Warbler, Tufted Titmouse, White-eyed Vireo, White-throated Sparrow, Worm-eating Warbler, Yellow-bellied Sapsucker, and Yellow-billed cuckoo. Seventy-eight birds have been recaptured thus beginning to show evidence of birds that are breeding at the Woodlands sites.

Kentucky Warbler

Blue-headed Vireo

Carolina Chickadee

# Service Learning in outdoor classroom

## Brown Foundation Funds Service Learning Project

Students at Belle Chasse Primary fill cells with soil in which they will plant their germinated seeds.

A contribution from the Joe W. and Dorothy Dorsett Brown Foundation Service Learning Program has made a joint project between Belle Chasse Primary School and Woodlands Conservancy possible. Students in Mrs. Newchurch's 4th grade class partnered with Woodlands Conservancy during the 2013-2014 and 2014-2015 school years to work on the "Seeds to Saplings" project. Woodlands Trail serves as their Outdoor Classroom to learn skills in Citizenship and Science through hands-on activities.

The "Seeds to Saplings" project focuses on learning about the local watershed, the value of forested wetlands and what a student can do as a citizen in their local community to contribute to the increasing health of their watershed. Students learn to identify, gather and germinate native seeds. They monitor the growth of their seedlings and finally plant the seedlings in restoration areas to improve the habitat for wildlife and migratory birds and increase the storm protection value of the forest to the community. Students participating in the project showed increased scores on the Science LEAP Test.

Supplemental support for the "Seeds to Saplings" project was provided by Shell during the 2013-2014 school year and by Chevron Oronite for the 2014-2015 school year.

## Tulane Student Internships

Internships made possible through Woodlands Conservancy's partnership with Tulane's Community Public Service program provide students with hands-on experience and provide Woodlands Conservancy with intelligent, energetic project help to build the capacity of our organization. Danny Lenger completed a Nature Guide of wildlife and vegetation found at Woodlands Conservancy. Lauren Hobson completely overhauled the website and Melanie Morgan created and implemented a "Hike for Your Health" program.

## Students Study Forest Characteristics

Edna Karr High School students spent the day at Woodlands Trail learning about the characteristics of a bottomland hardwood forest. Students identified trees and understory vegetation and conducted water quality testing experiments comparing the characteristics found in spring water to water found in canals and wetland areas at Woodlands Trail.

# Ecosystem restoration, research and

## Service Learning Partnership Enters 8th Year

The Spring of 2014 marked the eighth year of an ever-expanding partnership with Dr. Sean Anderson, California State University Channel Islands' Pacific Institute of Restoration Ecology, and Dr. John Lambrinos, Oregon State University Horticulture Department. Researchers split their time between Woodlands Trail and Delacroix Preserve, working with their twenty students to collect annual data of stem density and frequency of native and non-native vegetation in permanent research plots.

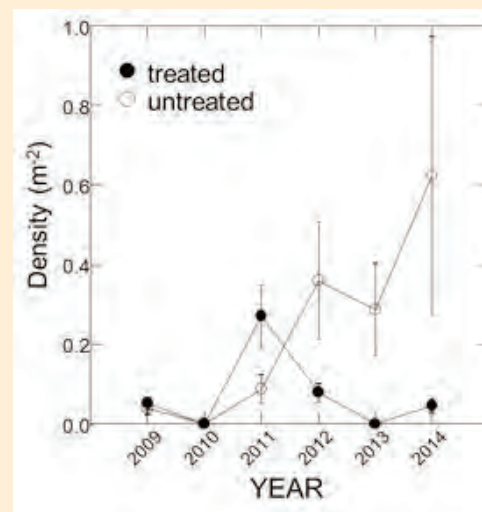

The permanent research plots were initiated in 2006 following Hurricane Katrina's removal of over 80% of the forest canopy that created open areas in which non-native invasive vegetation proliferated. The data collected helps Woodlands Conservancy plan activities to remove non-native vegetation and determine what native species to plant to help enhance the habitat for wildlife and migratory birds.

In 2014, vegetation samples were collected and taken to the Tulane Herbarium to validate identification for inclusion in planned professional journal articles.

The graph pictured to the right shows the density of Chinese Tallow over the past six years. Removal efforts occurred between the 2009 and 2010 assessment and again between the 2010 and 2011 assessment.

(left to right) Dr. John Lambrinos, Associate Professor of Landscape Ecology at Oregon State University, Dr. Tom Huggins, Ecologist at UCLA and Dr. Sean Anderson, Associate Professor of Ecology and Resource Management, California State University Channel Islands, Pacific Institute of Research Ecology.

# education in a critical habitat

## Funding for Ecosystem Restoration

In June 2013, Woodlands Conservancy entered into a 25 year agreement with the United States Fish & Wildlife Service's Partners for Fish & Wildlife program to conduct ecosystem restoration activities to enhance the Delacroix Preserve's habitat for wildlife and migratory birds. During the first year of the agreement, Woodlands Conservancy received a grant of \$39,900 from USFWS to remove non-native, invasive vegetation from the 190 acre Delacroix Preserve and institute management practices to address decreasing the feral hog population.

## Service Learning Efforts Expand to Include Tulane Introduction to Environmental Science Class

Service Learning efforts expanded in 2013 when Professor Jayur Mehta, Tulane University, brought his students to join the effort. The expanded partnership kicked off with a pairing of Tulane students with CSUCI students to conduct vegetation surveys in permanent data plots at Delacroix Preserve. Pictured above, CSUCI, OSU and Tulane students pose for a picture at the end of a week-end of working side-by-side at Delacroix Preserve.

*"The vision of Woodlands Conservancy is to be the regional conservancy model for the conservation of hardwood forests, and a leader in the advocacy and preservation of Louisiana's coastal forest ecosystems."*

# Volunteerism and trail usage...

## Chevron Oronite Volunteer Work Day

Soon after arriving at Chevron Oronite as America's Regional Manager, Tim Potter organized a visit to Woodlands Trail along with Chevron Oronite's Finance Officer, Greg Abdelnoor. After a two hour "hiking meeting," plans materialized for Chevron Oronite to take a more active role in Woodlands Conservancy's efforts. The kick-off of activities began with a Volunteer Work Day for Chevron Oronite employees who cleared limbs and branches along the Upland Trail at Woodlands Trail and Park.

## Tulane Participates in Restoration Efforts

Tulane's Introduction to Environmental Sciences class, led by Professor Jayur Mehta, worked at Woodlands Trail on National Public Lands Day, September 27, 2014. The students learned more about the bottom-land hardwood habitat from Tyrone Forman and Susan Norris-Davis who led an interpretive hike that was funded by a grant from the National Environmental Education Foundation (NEEF). Following the hike, the students planted hundreds of native trees in a restoration area along the Upland Trail.

## Bud Light – Keep America Beautiful join efforts to Do Good. Have Fun. at Delacroix Preserve

In early summer of 2014, thirty-one volunteers worked in unrelenting rain to clean up and have fun at Delacroix Preserve. The event was made possible by Keep America Beautiful, Bud Light, Power System Specialists and Air Bags, Inc.

### ACCOMPLISHMENTS – IN NUMBERS!

- 40 cubic yards of debris were collected
- 600 milkweed plants were planted
- 1300 feet of frontage was cleaned
- 300 pounds of bagged litter was collected
- 1 sign was installed

# numbers growing annually

## NEEF Funds Events at Woodlands Trail

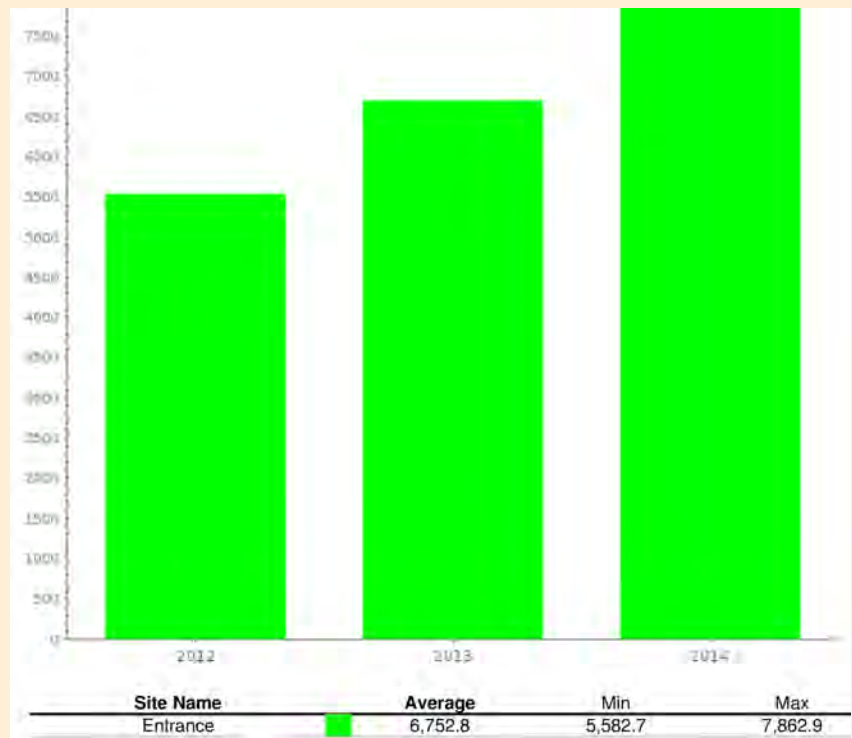

Woodlands Conservancy received funding from the National Environmental Education Foundation (NEEF) in 2013 and 2014 to hold special events at Woodlands Trail to help engage more individuals in activities at the public land site. The funding, made possible by Toyota Motor Sales, provides the opportunity to schedule educational, recreational or volunteer activities. The events held included a class in making ceramic plaques with items found at Woodlands Trail, a nature hike led

by Dr. Bob Thomas, Director of Environmental Communication at Loyola University, and a birding hike led by Joelle Finley, Cresecent City Bird Club. More events are scheduled to occur during Spring and Summer of 2015 including Nature Photography and Painting in Nature.
